

**Product Name:**

**CONTACT ADHESIVE SPRAY**

**Product Code:**

**SE00588**

**Pack Quantity:**

**1**

### Key Features

- 500ml
- The first product from the new generation of synthetic rubber/resin adhesives
- high solids/low solvent formula produces a quicker, stronger, more aggressive bonding system which out performs all conventional aerosol adhesives
- Ideal for carpets, carpet tiles, most vinyl floor coverings, fabrics, foams and felts, PVA skirting's and much more
- Contact adhesive has excellent high temperature resistance (110 degrees)

### Directions for use

The surface to be bonded must be clean, dry and contaminant free. Spray from approximately 25cm (10 ins), spray one surface horizontally and the other vertically each to a minimum coverage of 80%. Allow the adhesive to become touch dry. Press firmly together from the centre working outward to achieve a good contact and exclude any air bubbles.
