

Product Name:

CID ULTRA - INDESTRUCTIBLE PRESSURE WATER BOTTLE 11L

Product Code:

SE00104

Pack Quantity:

1

Key Features

- 11 Litre capacity
- Extreme high-pressure water bottle - once fully pressurised will empty the full tank without need for re-pressurising
- Designed for extreme site applications - very heavy duty & virtually indestructible!
- Made in Germany from extremely heavy-duty plastic
- Extra high-grade seals & robust construction
- Comes complete with a 4-metre heavy-duty hose for connecting to cut-off saws
- Can outlast low-cost alternatives by up to 5 times!

CID's Ultra Pressure Water Bottle is designed to provide the ultimate dust suppression system for use when cutting asphalt, clay, and concrete products. This pressure water bottle has been engineered for the most demanding site environments, and is made in Germany from extremely heavy-duty plastic – we call it virtually indestructible!

The extra high-grade seals and robust construction of the bottle allows for an extremely high pressurisation with only a few pumps, and the twist-lock handle enables the user to secure the pressure in place, before allowing the bottle to be completely emptied when discharged, without the need for constantly re-pressurising.

The Ultra Pressure Water Bottle comes complete with a 4-metre heavy-duty hose for connecting to cut-off saws via a simple push fit hose lock adaptor.
